**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments, see page 9, filed 14 September 2008, with respect to claims 1-8 have been fully considered and were persuasive therefore the 112 rejections of claims 1-8 has been withdrawn.
2. Applicant's arguments filed 22 September 2008 regarding claims 1-7 rejected under 35 USC§102(b) have been fully considered but they are not persuasive.
3. Upon further consideration, a new ground(s) of rejection is made in view of 35 USC§112. See below.

***Status of Claims***

4. Claims 9-45 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claims. Applicant timely traversed the restriction (election) requirement in Paper Dated. 15 April 2005.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 1-7 rejected under 35 U.S.C. 102(a) as being clearly anticipated by US Pub. 2004/0062847.

US Pub.'847 teaches an oil/fat composition containing alpha-linolenic acid, omega-6 fatty acids and omega-9 fatty acids that read on all of the ratios and applicable acids as defined in the dependent claims. See Table 1, col. 3 wherein the amounts of fatty acids are as follows: C18:3 n-3 (40.5); C18:1 n-9 (34.5); C18:2 n-6 (14:0), saturated fatty acids (C16:0 & C18:0 - total 10.7).

Applicant's Response

Applicants have while the composition taught in US Pub'8547 is directed to triglycerides and not just monoglycerides and diglyceride.

Examiner's Response

It should be noted as written, there is not indication that the lipids composition is a triglyceride which contain these moieties on the triglyceride backbone. There is no indication as the claims are written that the fatty acids listed must be attached to the glycerol backbone just present in the naturally occurring oil.

The following rejections are deemed proper.

***Claim Rejections - 35 USC § 112.***

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 2-8 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly

claim the subject matter which applicant regards as the invention.

4Claim 2-8 recites the limitation "as defined in claim 0" in line 1.

There is insufficient antecedent basis for this limitation in the claim.

All of these claims read on a claim that does not exist.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DEBORAH D. CARR whose telephone number is (571)272-0637. The examiner can normally be reached on Monday-Friday 8:30-5:00.
